

How to Install a New Door

Is it time to replace your door? Whether it's beat up or simply out of style, replacing an old door is an easy makeover. Use this guide to help you decide whether you should DIY or hire a guy for your door installation project.

Materials Required:

- New Door
- New Hinges
- Screwdriver
- Tape Measurer
- Hammer
- Safety Goggles

Steps:

- 1 Measure the old door and hinges to make sure the new door fits the existing space.
- 2 Using a screwdriver and hammer, remove the pins from the hinges to release the old door from the frame.
- 3 Align the new door to the old hinges and replace the pins to install the new door.

 HomeAdvisor tip: If the latch doesn't sit flush, chisel out wood from the door to change the depth.
