

## How to Install a New Sink

Installing a new sink is not an easy project. Use this guide to help you decide whether you should DIY or hire a guy.

### Materials Required:

- Adjustable Wrench
- Bucket
- Pliers
- Screwdriver
- Caulk Gun
- Plumber's Putty
- Pipe-Joint Compound
- Sink

### Steps:

- 1 Measure the space for the sink to ensure that your new sink fits into the space of your old sink. If they do not align, you will need to cut the countertop to make space.
- 2 To set the sink, apply a bead of plumber's putty to the topside of the sink's drain flange.
- 3 Tilt the sink onto its side and reattach the drain.
- 4 Repeat the application of the plumber's putty to the top of the garbage disposal flange.
- 5 Turn the sink upside down on a flat surface and attach the clips to the underside of the sink.
- 6 Apply a bead of silicone sealant to the underside of the sink's rim and carefully lower the sink into the countertop opening.
- 7 Align the sink and lock it tightly by securing the clips underneath.
- 8 Reattach the garbage disposal, waterlines and any other plumbing accessories.
- 9 Remove excess plumber's putty from the drain.

---

 HomeAdvisor Tip: When attaching the garbage disposal, reattach the snap ring by sliding it up the sink flange until it pops into place.
